The Evolution of
Care Communication

Clino Systemevo

The challenges in health care lie clearly to hand:

- Ensure cost effectiveness
- Simplify procedures
- Offer comfort
- Ensure security

Cliino Systevo is the innovative communication and information system for care facilities. It sets new standards.

Clino **systemeVO**

Clino SystemeVO offers hospitals and care facilities numerous advantages:

- Efficiency and economy
- Maximum security
- More comfort functions
- Simple integration and modernization

Work economically

”

Thanks to Clino Systevo our procedures are significantly more efficient. That lowers the costs.

Carl Bellmann, Administration Manager

“

Optimized Processes

From communication and information through to documentation and billing: Through the intelligent use of technology, Clino Systemevo arranges all areas and processes more efficiently than ever before

Future-proof investment

Clino Systemevo consistently relies on open standards in order to network with other systems. As a result, in particular this involves a future-proof investment.

Economical Lifecycle Costs

Open standards and standardized system components also mean a significantly reduced number of tasks for Operation, Service and Maintenance. Easily replaceable spare parts ensure long-term retention of value.

Welcome Higher Revenues

The system enables a broad range of added-value services at the Point of Care and thereby opens up additional sources of income. Networked with the Hospital Information System (HIS) the services offered can be billed with the minimum of administrative effort.

Rising number of cases with shorter and shorter hospital stays, indicate the need for greater relief and efficiency.

Clino Systemevo supports the management of the facility:

- Simplifies the billing and administration
- raises the profitability of the company

Maximum Security

Intelligent Alarm Management

Clino Systemevo always forwards alarms with the right priority to the right people. By using interfaces, various safety facilities can be integrated, such as:

- Fire alarms
- Track & Trace
- Hazard management systems
- Evacuation systems
- Medical monitoring

Secure Documentation

Networked with the Hospital Information System (KIS), Clino Systemevo enables access at any time to the Electronic Patient File: Current care data are input and called up directly at the Point of Care. In this way, they can be used for nursing planning and quality management and protected against unauthorized access.

Medical monitoring: Clino Systemevo processes the measured values of MySign S

MySign S is a certified medical device by EnviteC by Honeywell distributed by professional resellers.

The advantages for the nurses and the operators are found in a single source:

- Safe monitoring of patients and residents,
- Reliable documentation of services, presences and reaction times.

”

With the new system,
I receive only those calls
and alarms that are meant
for me. This ensures safety
and calm on the ward.

“

Kim Stornten, Nurse

Greater comfort

”

I can operate the TV, radio and light using just one device. It doesn't get more convenient than that.

“

Thomas Miller, Patient

Superior class of patient handset: Systevo Com combines all important functions in one device at the patient's bedside.

Individual range of infotainment

The System Clino Systevo makes it possible to equip "private" rooms and to offer convenient media solutions at the Point of Care. Services such as Internet and Internet Telephony (VoIP), IP-TV and Video on demand are integrated via a Multimedia terminal.

One device for everything

The integrated Systevo Com patient handset is an example of the new comfort. The ergonomically designed device offers:

- Discrete communication with the nursing staff
- Convenient room control
- Secure nurse call

Greater convenience at the Point of Care captures additional potential for operators:

- New sources of income through added-value services
- Relief of the nursing staff through leaner processes
- Competitive edge in acquiring customers

Simple Integration and Modernization

Open Standards

Through the consistent use of standard technology, Clino Systevo brings all of the required information together at the Point of Care.

Intelligent Networking

Existing infrastructures are used further and extended meaningfully. Without complicated conversions or major interventions in ongoing operation.

The new system control center:
Systevo Control makes completely
different systems and functions

The advantage for IT and Technology:

- creates a more powerful infrastructure
- uses existing lines and media services
- enables system-wide maintenance per IP

”

The open IP structure of Clino Systevo makes networking easier than ever before. This means that everything fits together

“

Christian Vogt, IT Director

Intelligent Life Care: Two strong brands – one global solutions provider at the Point of Care

Intelligent Life Care is an independent Business Unit, which combines two strong brands in the Honeywell Group.

Ackermann offers individual integrated solutions for safety, patient comfort and the optimization of complex care and documentation processes.

EnviteC is specialized on non-invasive sensorics in Intensive and Emergency Medicine as well as in the field of Mobile Monitoring Systems.

Together, we support the Health Care and Care Facilities with modern technical solutions for greater efficiency, safety and comfort in nursing care. For the benefit of patients, residents, staff and the operator.
